products & platforms	services	offices: UK, Pakistan & UAE

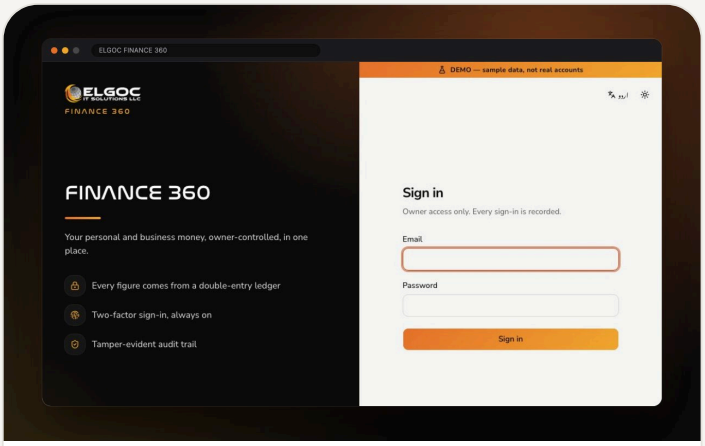

ENTERPRISE & SME

ELGOC ERP

One platform for finance, sales, procurement, inventory, HR and payroll, projects and IT service for multi-company groups in the UAE and Pakistan. An SME edition covers accounting, stock and billing for distributors and retailers.

BUILT FOR Groups, distributors, trading and service companies

- Full double-entry finance: ledgers, AR/AP, banking, budgets, fixed assets, FX, period close
- Intercompany matching and simplified consolidation across companies (AED and PKR)
- CRM pipeline, proposals that convert to invoices, price lists and commissions
- HR and payroll with country rule packs; projects with WBS, Gantt, timesheets and billing
- IT service desk with SLA clocks, contracts and recurring AMC billing
- Purchase and sales cycles with three-way match, credit holds and stock reservation

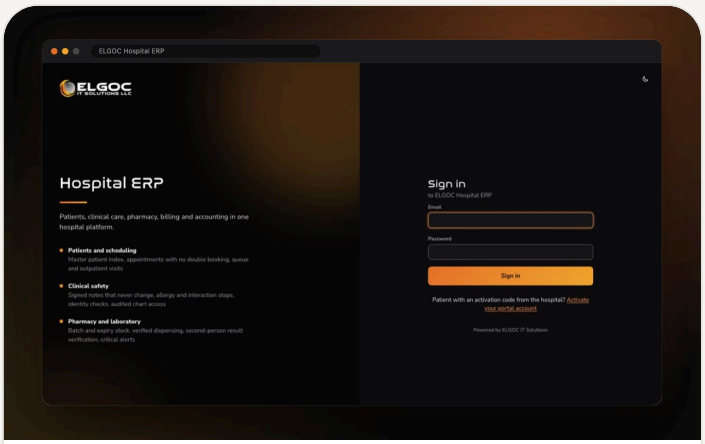

OWNER FINANCE & MULTI-BUSINESS

ELGOC FINANCE 360

One place for an owner's personal and business money, kept on a double-entry ledger so every figure can be traced. Live on the web, with an Android app for the phone.

BUILT FOR Owners who run several businesses and their own finances together

- Several businesses and personal books under one owner sign-in, with two-factor always on
- Banking and cash, quick entry, drafts, recurring entries and attachments
- Receivables, payables, loans and ageing; investments and fixed assets with depreciation
- Statements and reports as PDF, Excel and CSV
- Offline entry on the phone that syncs later; voice and receipt capture that the owner confirms; a read-only assistant that cannot change the books

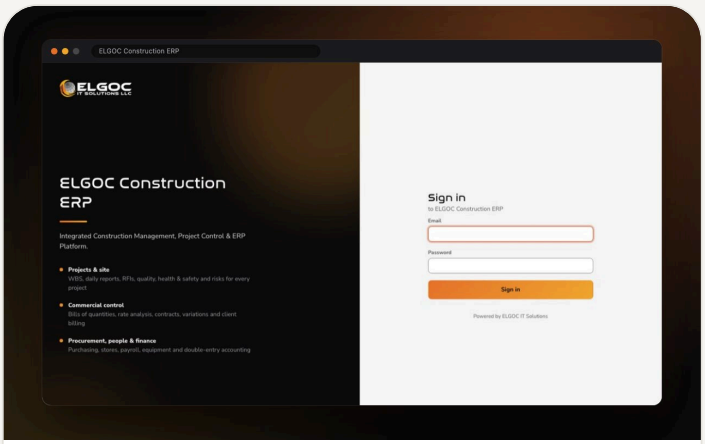

HEALTHCARE

ELGOC Hospital ERP

Hospital information system for hospitals and clinics: patient registration, OPD, pharmacy, laboratory, radiology and reception queues on one platform, designed around patient-safety checks.

BUILT FOR Hospitals, clinics and diagnostic centres

- Patient index with check-digit MRNs, encrypted national IDs, duplicate detection and merge
- Appointments with database-enforced no-double-booking, queue tokens and waiting-room display
- Pharmacy with batch and expiry stock, allergy and interaction checks, controlled-drug register and counter POS
- Laboratory with specimen identity checks, result flagging, second-person verification and critical alerts
- Radiology orders with contrast, pregnancy and laterality safety checks

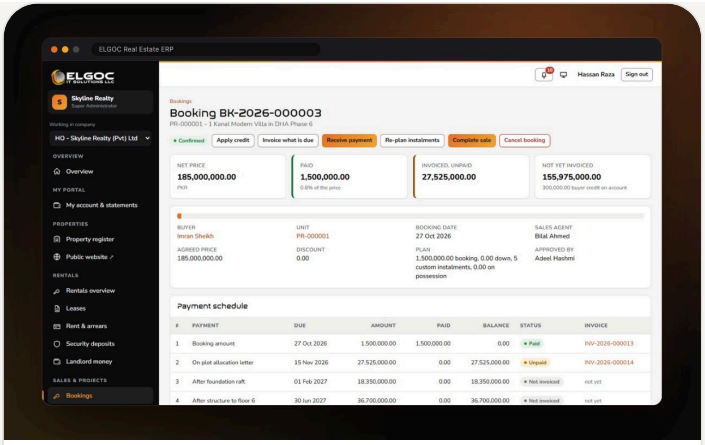

CONSTRUCTION

ELGOC Construction ERP

Project control and ERP for contractors, from estimate and BOQ through procurement, site progress and client certificates to project profitability.

BUILT FOR Contractors, developers and project management offices

- WBS and CPM scheduling with baselines, S-curve and earned value (SPI, CPI)
- Rate analysis, versioned BOQ, client contracts, variations, retention and advances
- Procurement with RFQ comparison and three-way-matched invoices; subcontract certificates
- Interim client certificates from measured BOQ with deductions and liquidated damages
- Plant cost per machine, site attendance, budget vs committed vs actual by WBS

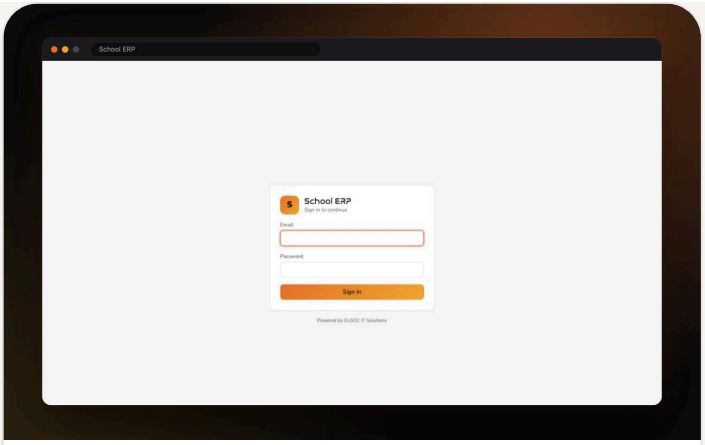

REAL ESTATE

ELGOC Real Estate ERP

For agencies and developers: property registry and public listings website, project and unit bookings with instalment plans, rentals, accounting and a customer portal.

BUILT FOR Property developers, agencies and landlords

- Property registry with owners, mandates, media, valuations and approvals
- Public listings website with search, map and radius search, calculators and SEO
- Unit bookings with payment schedules, custom plans and instalment re-planning
- Customer portal with invoices, statements and booking status
- Consolidated P&L and balance sheet across companies

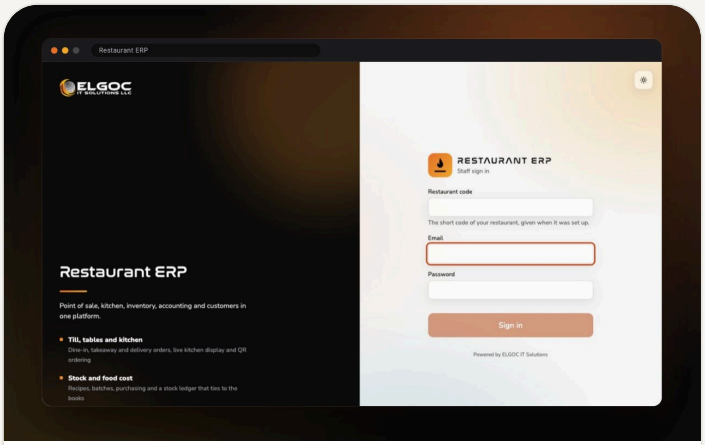

EDUCATION

School ERP

School management for multi-campus schools: admissions, academics, fee billing, accounting, HR and payroll, transport and library, with parent, student and teacher portals.

BUILT FOR Schools and multi-campus school groups

- Admissions, attendance, timetable and homework
- Exams, results and promotion with grading scales
- Fee structures, invoicing, payments and accounting with banking
- Staff, leave and payroll; transport, library and inventory desks
- Parent, student and teacher portals with per-role visibility

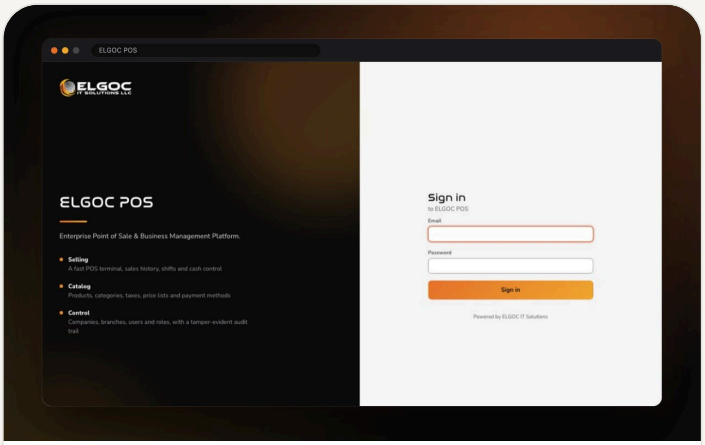

FOOD SERVICE

Restaurant ERP

On-site restaurant ERP and POS for multi-branch restaurants: dine-in, takeaway and delivery, kitchen display, food cost, CRM and accounting.

BUILT FOR Restaurants, cafes and multi-branch food chains

- POS for dine-in, takeaway and delivery with floor and table management
- Real-time kitchen display (KDS)
- Recipes, inventory and food-cost control with counts, transfers and adjustments
- Customer CRM with loyalty, campaigns and a QR menu page
- Double-entry accounting, HR and delivery riders; hardware-bound licence activation

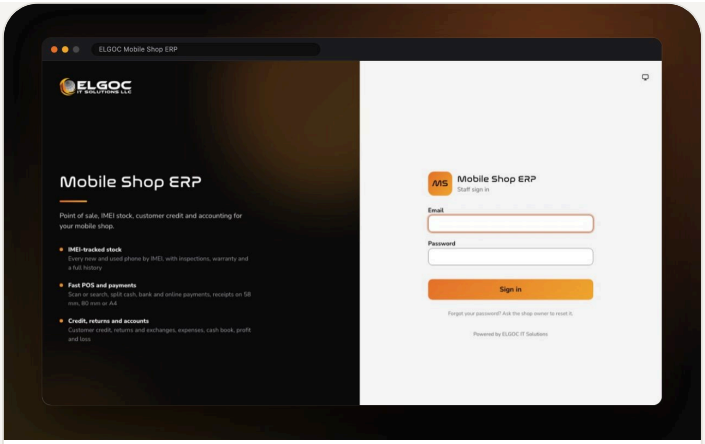

RETAIL & RESTAURANT POS

ELGOC POS

A multi-branch point-of-sale and back-office platform, delivered as separate editions for cloth shops, auto spare-parts shops and general trading: stock with landed cost, supplier and customer ledgers, accounts, reports and an owner dashboard, in English and Urdu.

BUILT FOR Retailers, spare-parts and cloth shops, and restaurants with several branches and tills

- Terminal checkout with receipts, returns and exchanges; cash and credit sales
- Stock ledger with weighted-average landed cost, purchases with freight, supplier payments
- Cloth by the thaan: cut by meters or suits, per-thaan cost, barcode and QR labels
- Customer ledgers, accounts, expenses, and 23 reports with profit, dead stock and best sellers
- Owner dashboard, Urdu interface, bill PDF and WhatsApp sharing, daily backups

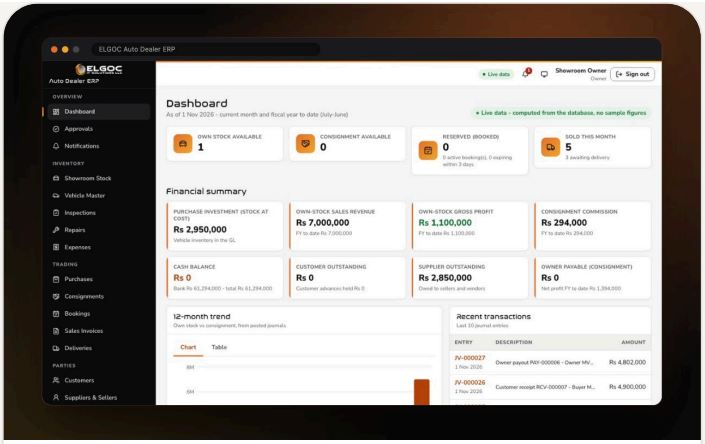

MOBILE PHONE RETAIL

ELGOC Mobile Shop ERP

POS, IMEI-tracked inventory, customer credit and accounting for a mobile phone shop. In daily use at a retail shop.

BUILT FOR Mobile phone and accessories retailers

- IMEI-tracked phones (dual IMEI, grades, inspections with photos, full history)
- POS with scan and search, split payments, credit limits and hold/resume
- 58 mm, 80 mm and A4 receipts with WhatsApp sharing
- Returns, exchanges, warranties and repair tickets
- Database-enforced rules: no duplicate IMEI, no double sale, no negative stock

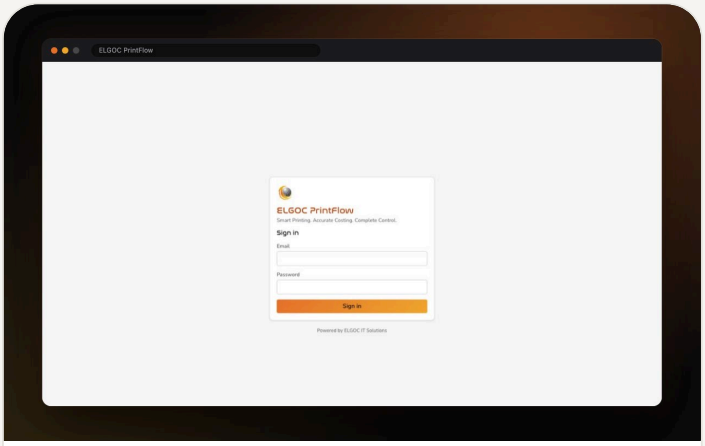

AUTOMOTIVE DEALERSHIPS

ELGOC Auto Dealer ERP

For new and used car dealers who run both company-owned stock and consignment sales. Every car's cost and profit comes straight from the general ledger, so the numbers always reconcile.

BUILT FOR Car showrooms and dealerships

- Own-stock purchases, repairs and costs added to each car; profit per vehicle
- Consignment agreements (fixed, percentage or excess-over-net commission) kept off the balance sheet
- Bookings with advances, approved refunds, invoices, delivery challans and returns
- Maker-checker approvals for discounts, price changes, write-offs and refunds
- 14 branded documents (invoice, agreements, challan, settlement) with preview and PDF

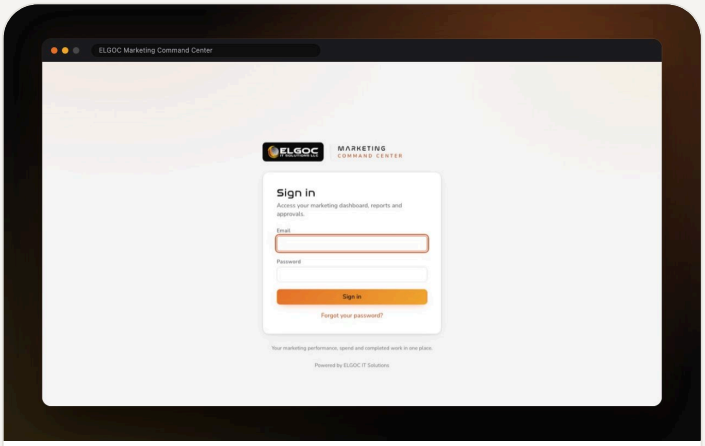

PRINTING & SIGNAGE

ELGOC PrintFlow

Order-to-cash and production management for panaflex and large-format print shops, with job-level costing and profitability.

BUILT FOR Large-format printing and signage businesses

- Server-priced orders by size, material and finishing, with rush and minimum-area rules
- Versioned quotations and artwork with exact-version customer approval
- Production Kanban with machine and operator assignment, QC and reprint tracking
- Roll-level material inventory, machine utilisation and cost per sq ft
- Dispatch with partial deliveries and proof of delivery; 34 reports

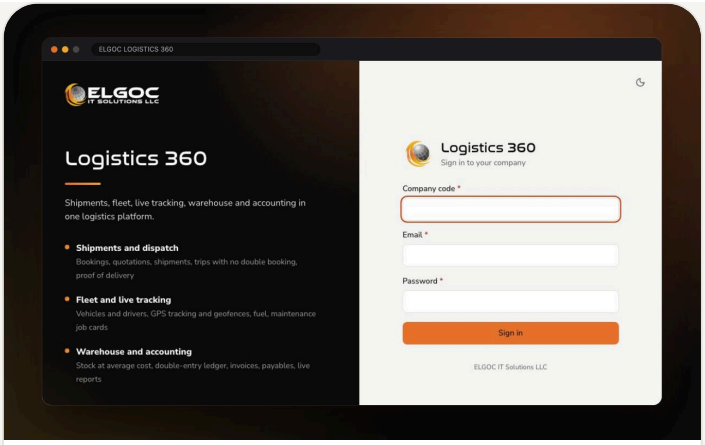

MARKETING AGENCIES

ELGOC Marketing Command Center

A client portal where an agency's clients see spend, results, deliverables and pending approvals across ads, email, SEO and social, without asking the agency.

BUILT FOR Digital marketing agencies and their clients

- Executive overview with 26 KPIs, period comparison, charts and goals vs actual
- Ads, email, SEO and social content calendar with approval workflow
- Lead register with funnel, source attribution and duplicate detection
- Nine report types as PDF and CSV from stored snapshots
- Integration centre with encrypted OAuth tokens, sync jobs and retries

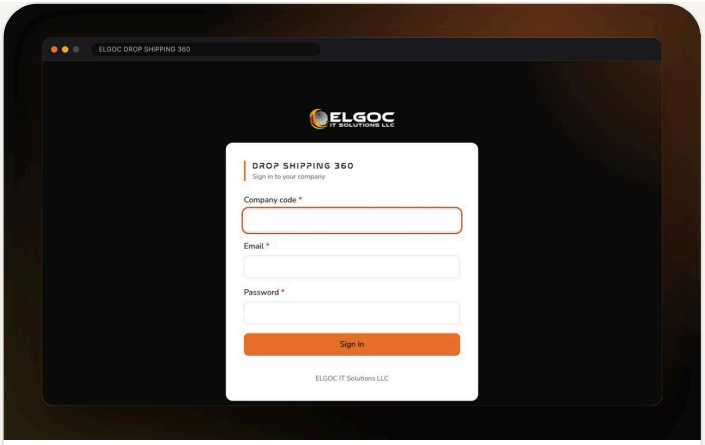

LOGISTICS, FREIGHT & FLEET

ELGOC LOGISTICS 360

Transport, freight and fleet management in one platform, from the booking to the proof of delivery and the invoice. Demonstration available; going live is planned.

BUILT FOR Transport companies, freight forwarders and fleet operators

- Bookings, quotations, shipments and trips with no double booking, proof of delivery and E-Bilty
- Vehicles and drivers, live GPS tracking on a control tower, geofences, fuel and maintenance job cards
- Warehouse stock at average cost, container seals with QR codes, customer portal with public tracking
- Double-entry accounting: invoices, payables, banks, assets and live statements; HR and payroll
- Driver and customer mobile apps; an AI operations agent for alerts, escalation and daily reports

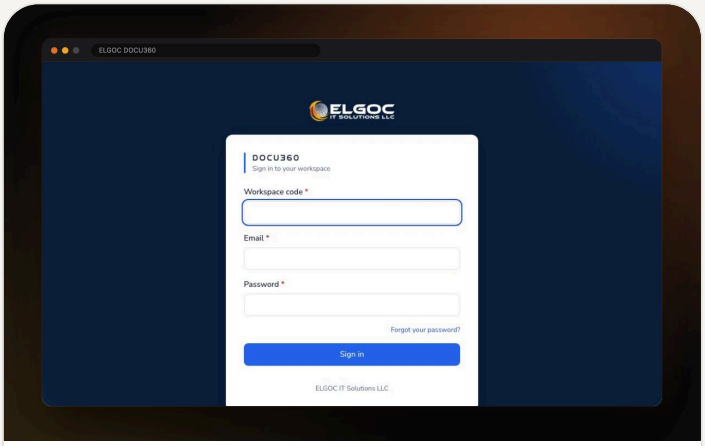

DROPSHIPPING & E-COMMERCE

ELGOC DROP SHIPPING 360

An omnichannel dropshipping ERP for companies selling across several stores and marketplaces: catalogue, suppliers, orders, fulfilment, marketing, customer service and accounting in one place. In active development.

BUILT FOR Online sellers running multiple stores and marketplaces

- Catalogue, supplier and pricing management with product research
- Unified orders from every channel, purchase orders to suppliers, fulfilment and shipment tracking
- Marketing command centre with ad spend, ROAS and campaign figures
- CRM, customer service and returns; accounting with finance reconciliation
- AI agents and analytics assistance; Shopify, WooCommerce and CJdropshipping connectors in beta

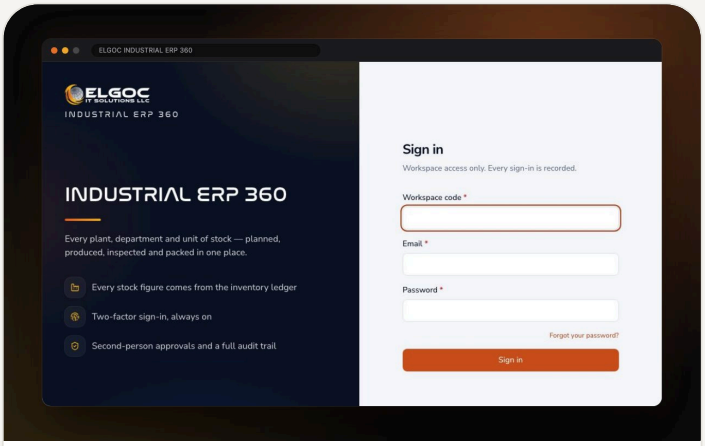

DOCUMENT INTELLIGENCE & COMPLIANCE

ELGOC DOCU360

A digital vault for personal, family and business documents, with an AI scanner that proposes document types, owners and expiry dates for a person to verify. In active development.

BUILT FOR Companies, families and professionals who must keep documents valid and on time

- Document vault with versions, folders, full-text search, preview and recycle bin
- AI scanner for PDFs and photos: every suggestion is approved or corrected by a person
- Expiry calendar with automatic reminders by e-mail, SMS, WhatsApp and push, and renewal tasks
- Compliance centre that checks people, vehicles and companies against your own requirements; reports as CSV, Excel and PDF
- Secure share links, electronic signatures with certificates, and forms with QR codes

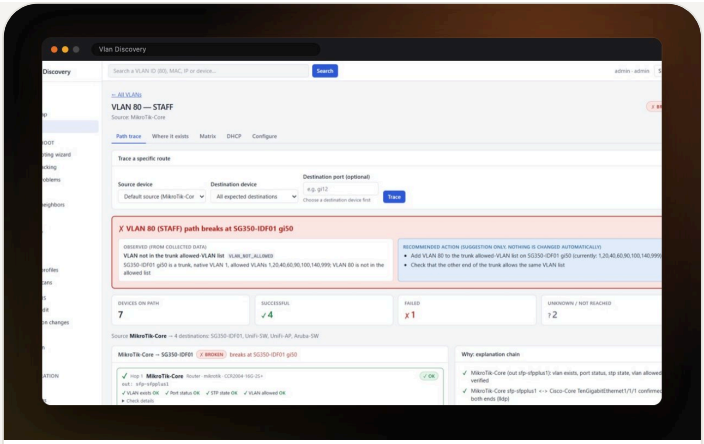

MANUFACTURING

ELGOC INDUSTRIAL ERP 360

A multi-plant manufacturing ERP covering production planning, department inventories, work in progress, quality, packing and finished goods across eight configurable plants, managed centrally. Demonstration available; going live is planned.

BUILT FOR Manufacturers running several plants and departments

- Production orders with bills of materials and routings
- Independently controlled inventory for each department, with every stock figure read from the ledger
- Quality checks, packing and finished-goods control
- Central management of eight configurable plants with role-based access
- Second-person approvals, two-factor sign-in and a full audit trail

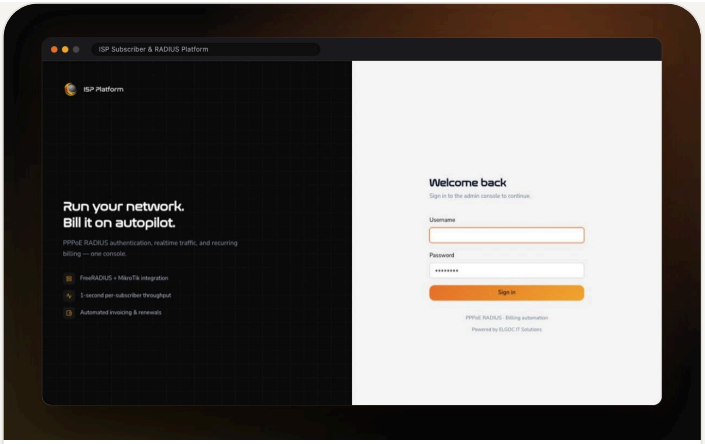

NETWORK & ISP

Vlan Discovery

Type a VLAN ID and see where it exists, where it passes, where it stops, why, and which device or interface to fix. Runs on the web or as a Windows desktop app.

- Vendor adapters for MikroTik, Cisco, Aruba, UniFi and generic SNMP, normalised into one model
- VLAN path trace with stop-reason detection and remediation suggestions
- Network map, MAC and IP tracking, audits and reports
- Encrypted credential vault, RBAC, MFA and single sign-on

NETWORK & ISP

ISP Subscriber & RADIUS Platform

Authentication and billing core for internet service providers running PPPoE on MikroTik: subscribers, plans, NAS management and change-of-authorisation.

- FreeRADIUS with SQL and REST policy to the platform API
- Subscribers, plans and NAS management
- Billing automation (in progress) and change-of-authorisation service
- Time-series accounting data and background workers

CLIENT WORK

Built to a client's brief

Client names are shared on request, with their permission.

CASE STUDY

Safety-training institute, Pakistan

A professional HSE training institute needed one system from first enquiry to certificate, and a new public website where employers can verify any certificate.

WHAT WE DELIVERED

- Institute ERP: enquiries, admissions, batches, attendance, fees with local payment methods, exams
- Certificates with a public QR verification page linked from the website
- Student portal and LMS, corporate clients, receipts, ID cards and registration forms as PDFs
- Responsive marketing website with course catalogue and certificate lookup

CASE STUDY

Online brokerage platform

A brokerage start-up needed its back end built before launch: client accounts, KYC, a money ledger that never uses floating point, manual deposit and withdrawal approval, and a trading engine with live risk control.

WHAT WE DELIVERED

- Accounts with two-factor sign-in, KYC uploads and an admin back office
- Immutable decimal money ledger; approved deposits and withdrawals with holds and daily limits
- Trading engine with live price streams and a risk worker for stop-loss, margin call and stop-out
- Idempotency on every money and order request; public website and deployment kit

CASE STUDY

Gold market analysis workstation

A private analysis workstation for gold (XAUUSD): rule-based setup detection on live charts, with every decision explained and alerts sent by email and Telegram.

WHAT WE DELIVERED

- Rule-based setup detection with multi-timeframe context; signals released only when strict rules pass
- Email and Telegram alerts with chart image and plan; weekly paper-trading report
- Order-book view, economic calendar with actuals, and document search with OCR
- AI explanations through a multi-provider fallback chain

HOW WE BUILD

Engineering you can rely on

01

Books that balance themselves

Double-entry accounting at the core. Balances, statements and per-item profit are read from the general ledger, so reports always agree.

02

Rules in the database

No double sale, no negative stock, no unbalanced journal, no edited invoice: the database itself refuses, even if the application has a bug.

03

Two people for money

Discounts, refunds, write-offs and payment reversals need a second person's approval. Nobody approves their own request.

04

Every change on the record

A tamper-evident, hash-chained audit log of who did what and when, with old and new values. Sensitive personal data is encrypted.

05

Checked before you see it

Every product is tested and reviewed before it is handed over to you.

06

Honest status

We say exactly what each product does and what stage it is at, with no inflated claims.

SERVICES

One accountable partner

Software is one part of what we do. The same team designs, installs and supports the infrastructure it runs on, around the clock.

- Custom application development
- Web design & development
- IT infrastructure & networks
- Cybersecurity & compliance
- Cloud & data center
- CCTV & surveillance
- VoIP & unified communications
- Annual maintenance (AMC)
- IT consulting
